CLICK is a boltless shelving system. The minimalistic form and construction, as well as the visual lightness, form the aesthetic characteristics of the shelf. Constructed of 2.5mm thin sheet steel, a girder and shelves, the system functions similar to a construction kit. Only four screws fix the girder together to which the shelves are simply hung up without any tools. The material and precision of the components guarantee the stability and assembly.

CLICK, 2014, Sigurd Larsen commissioned by NEW TENDENCY
